

# A FUTURE-PROOF APPROACH

Reuse the core and renew the filling

## Your advantages:

- Sustainable business: reduce both operating costs and the impact on the environment
- We take care of everything: send the brush to us. We'll take care of the rest.

**Step 1:** The core construction can be an expensive brush component. We use our knowledge and expertise to determine whether your brush can be fitted with new filling.

**Step 2:** We ensure that the entire core structure is free of defects (tolerances, bearings, removal of the old bristles).

**Step 3:** After approval of the core structure, the brush will be refurbished.
