Brushing Solutions

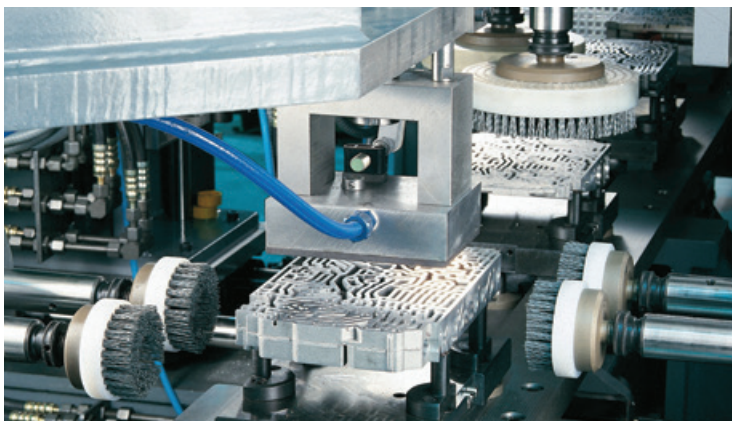

SOLUTIONS IN PRACTICE

Our industrial brushes and brush tools are used in many industries and applications and are suitable for use on a wide range of existing machines and power tools.

Kullen-Koti produces brushes in all sizes and configurations, from miniature interior brushes up to 2.5 m brush plates for the metal industry.

Filled in materials such as steel wire, bonded steel wire or steel cables, nylon, nylon abrasive and natural fibres. We are able to provide solutions for your application.

Automotive industry

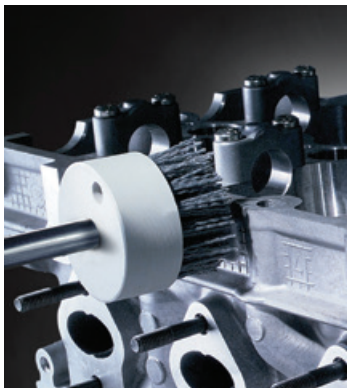

Removing dust before painting body works. Derusting and smoothing body works and surfaces. Deburring of edges of engines and transmissions. Cleaning cables and sealing openings...

Wire industry

Descaling products and removal of blasting abrasives after treatment. Oiling and cleaning cables...

Wood industry

Structuring, oiling, waxing and matting wooden surfaces. Superimposing wooden products with a specific liquid...

Ceramics industry

Cleaning of ceramic and porcelain, cleaning and finishing of surfaces such as tiles. Structuring and oiling forms...

Engineering & machine industry

Deburring and surface finishing of machine components for aerospace or marine applications...

Metal working industry

Deburring edges of metal cases and frames. Oiling engine components and forms. Pre-treatment of metal or steel plates and metal products such as rims. Transporting and deburring metal plates...

Rolling mill industry

Removal of dirt before treatment and blasting abrasives after treatment...

Raw materials

Structuring certain materials to get a specific quality such as stone, concrete, glass, marble, bitumen, tar...

Rubber processing (vulcanized)

Coating rubber products with a specific substance. Roughening or cleaning rubber products before coating...

Work tool industry

Derusting and descaling products with tradesman's tools. Smoothing surfaces after welding. Polishing surfaces before treatment...

Other fields of experience

Pipeline industry, aircraft construction, shipbuilding, wind energy, off-shore and petrochemical industries...

If you can't find your brush solution or would like more information about the brushes and their specifications, please contact our technical advisors or sales team.

Unlimited possibilities

In many ways our brushes provide added value to your products. Whether it's applying the final finish or making materials ready for the next process, Kullen-Koti brushes can enhance the appearance, durability, and functionality of all kinds of materials:

- Steel
- Stainless steel
- Cast iron
- Aluminium
- Copper
- Metal
- Brass
- Natural stone
- Wood
- Asphalt
- Plastic
- Concrete
- Ceramics
- Glass

...and many more!
